

Anti Ligature Detector Base

Absolute Essentials – Detector Bases

Part No. T10048

Product Details

The Anti Ligature Detector Base provides additional safety to occupants within secure facilities.

With a built-in magnetic switch that provides loop continuity when multiple items are removed. Once in place, should a load of more than 3.4kg be exerted on the installed lower base unit, it will separate, disconnect the electric power connection and prevent the formation of a potential ligature point.

Another feature is the anti-contraband lip that prevents the seclusion of banned substances.

The Anti Ligature Detector Base is also approved for in-cell detection by National Offender Management Service (NOMS) in England.

Key Features

- Built in magnetic switch which provides loop continuity when multiple items are removed
- Anti-Tamper lip to prevent storage of contraband between base and detector
- Simple design and easy to install
- Certified to 3.4kg release load
- Easy to reinstate the device if removed
- Approved for in-cell detection by National Offender Management Service (NOMS) in England
- Labour saving installation as no need for T-Breaker to maintain loop continuity
